

What our customers say:

SmartPeak WLM is the most complete workload management solution for your Windows-based systems. That's why over 2,000 customers use SmartPeak technology.

→ **Increase server capacity & reduce server sprawl:**

"Using SmartPeak WLM has given us a 100% increase in our server capabilities in terms of concurrent connections and resulted in a 20% reduction in the number of servers required to complete the project."

Greg Davis, Senior Enterprise Network Analyst

→ **Ensure service level agreements (SLAs) are met:**

"We are now working to commercial SLAs with our customers, so by using SmartPeak WLM we can be confident that everyone gets an equal share of the service they are paying for and that performance is at an optimum."

Rob Jones, IT Services Development Manager

→ **Control application resource usage & guarantee quality of service:**

"With SmartPeak WLM, I can prevent applications from monopolizing CPU and memory resources, so that I can guarantee performance of key services without purchasing more servers. SmartPeak gave us the ability to even further streamline and enhance the use and performance of our environment."

Ray Anderson, Lead Systems Engineer

→ **Easy to deploy & manage:**

"I have found no similar product in the market place to SmartPeak WLM. I needed to test and deploy a solution very quickly to put an end to our performance issues and I was able to do this very well with WLM."

"It has significantly improved our ability to provide a more stable and robust service to our users, and that is a very important development for our organization."

Bertil Andreasson, Technical Manager
